React | Python | Blockchain | Native React | Web Development | Virtual Design | AI Expertise

Professional Overview

Motivated and results-oriented web developer with in-depth knowledge of React.js, React Native, Next.js Python, and Blockchain technologies.

Experienced in designing and developing high-quality web and mobile applications with a strong focus on user-friendliness and performance.

Skilled in creating interactive and responsive interfaces with a keen eye for detail in Virtual Design, Adobe Illustrator, Adobe Photoshop.

Possesses extensive knowledge of AI technologies and the latest developments in this field.

Highly experienced in digital marketing, effectively combining technical expertise with strategic marketing insights to drive user engagement and product success.

Skills

Front-End Development: React, Next.js, React Native, HTML5, CSS3, JavaScript (ES6+), TypeScript, NodeJS, SQL

Back-End Development: Python (Django, Flask), MySQL, MongoDB

Blockchain: Smart Contracts, Ethereum - Solidity, Solana - Rust, Binance Smart Chain, Web3.js

Mobile Development: React Native

Web Development: RESTful APIs, GraphQL, Responsive Design, Progressive Web Apps (PWA), WordPress

Virtual Design: UI/UX Design, Prototyping, Wireframing, Figma, Adobe Illustrator, Adobe Photoshop

AI Expertise: AI integrations, Machine Learning, Prompt Engineering, Up-to-date with the latest AI developments

SEO: Google Analytics

Work Experience

Front-End Developer | Freelance January 2017 - Present

Developed and maintained dynamic and responsive web applications using React.js, Next.js and TypeScript.

Implemented advanced UI/UX principles in collaboration with the design team to optimize the user experience.

Built and integrated APIs with back-end systems written in Python.

Researched and implemented blockchain solutions for integrating smart contracts into business applications.

Applied AI technologies to enhance user experience and automation within projects.

Web Developer @Nex AI | March 2021 - Present

React Native Developer @Social Metic | Freelance July 2024 - Present

Developed cross-platform mobile applications with React Native, providing a seamless user experience on both iOS and Android.

Worked on blockchain projects to integrate decentralized technologies into mobile apps.

Certifications

Certified HTML5 - CSS3 Developer - [@Kisp Volwassenenonderwijs, 2017]

Certified React Native Developer - [@Designcode, 2019]

Certified React Designer - [@Designcode, 2019]

Certified Proof Of Stake Blockchain - [@Udemy, 2020]

Projects

Blockchain-Enabled Voting System

Developed a secure voting system using blockchain technology and smart contracts on the Ethereum network.

Developed an AI-driven chatbot for customer service, applying machine learning algorithms to enhance customer interactions.
